

COLOP e-mark® water resistant cotton ribbon – Product information

Short description:

The special coating of the ribbon optimally protects your imprints from environmental influences such as water and also makes your imprint appear sharper and more brilliant.

With these properties, this ribbon is particularly suitable for the finishing of flower arrangements or wine/champagne bottles. But of course, in addition to decorating objects for that special moment, there are numerous other ways in which this ribbon can fully demonstrate its qualities.

In this way, wonderful event wristbands can be designed for any occasion and in addition, nothing gets in the way of designing your own lanyard.

The tape, which consists of 100% cotton, is available in a width of 15 mm and a length of 25 running meters. It is perfectly matched to use with the COLOP e-mark Ribbon Guides.

It is recommended to print on the outer side of the ribbon for best results.

Product features:

- Ribbon is compatible with Ribbon Guides
- Water resistant imprints
 - Not suitable for washing machine
- Ideal for personalizing gifts
