

COLOP e-mark® go Ribbon Guide Product data sheet and description

Short description

The Ribbon Guide enables you to personalise ribbons and similar items with a width of 10, 15 or 25 mm in a simple and effective way and for any occasion.

Important user information

Ribbons and objects with a width of 10 mm are smaller than the actual printing area of the COLOP e-mark® go. To avoid unnecessary staining, please ensure that the printouts are designed accordingly.

Usage

The ribbon guide is used to print on ribbons or narrow, long objects in three sizes. The ribbon to be printed is threaded through the ribbon guide, the e-mark® go is inserted and printing is carried out with a sideways movement. It works best if you hold the ribbon and move the e-mark® go in one direction. To print on longer ribbons, use the 'continuous printing' function in the app.

Any handling other than that described in this document does not comply with the purpose of this product.

The product is not a children's toy.

Product features

- For ribbons and objects in bandwidths of 10, 15 and 25 mm
- Innovative design
- Perfect to use with the COLOP e-mark ribbon and endless label product range
- Made in Austria
