

COLOP e-mark® Endless label white glossy & transparent – Product data sheet and description

Short description

Thanks to a specially coated surface, COLOP e-mark® endless labels can be used to create splash-proof and scratch-resistant labels for a wide range of applications in the simplest way possible. Whether you are labelling storage boxes in the kitchen, school supplies or other items, these highly adhesive and durable labels set no limits on creativity and efficiency.

Usage

The white and transparent endless labels have been developed to be printed with one of the e-mark devices. We recommend using the COLOP e-mark ruler for printing. For optimal handling of the labels, simply leave the roll in the packaging and pull the label out of the packaging along the upper marked flap. This simply avoids unintentional unrolling of the label from the roll.

The backing material of the 16 mm wide roll has a double-sided overhang of 1 mm to ensure that the label can be easily detached. The actual width of the adhesive label is 14 mm, which is perfect for a seamless, full-surface print.

Longer drying times may occur with full-surface, dark design elements. Slow down your printing speed for an optimal print quality.

Any handling other than that described in this document does not comply with the purpose of this product.

The product is not a children's toy.
